Leprosy—New South Wales.¹

The following information was taken from the report on leprosy of the board of health of New South Wales for the year 1912:

On January 1, 1912, there remained under detention at the lazaretto 18 persons.

During the year 1912, 5 persons were reported to the board as suspected of leprosy, and of this number 4 were duly certified as lepers and admitted to the lazaretto. One death occurred during the year in the person of a native of Hawaii, admitted in 1906, and one patient was discharged. On December 31, 1912, there remained under detention for leprosy 20 persons.

The notification of leprosy was made compulsory and the detention of lepers provided for toward the end of the year 1890.

The total number of persons admitted to the lazaretto since 1883, when lepers were first received, is 128, as shown by the following table, taken from the report above referred to:
